

MICHAEL IAN J. JAPONE

FULL STACK DEVELOPER | DATA ANALYST

09266314133 | michaelianjapone@gmail.com | Calauag, Quezon | LinkedIn: michael-ian-japone |

Portfolio: <https://my-portfolio-michaelianjapone.vercel.app>

Detail-oriented Full Stack Developer and Data Analyst with experience in building web applications, analyzing datasets, and delivering data-driven solutions. Skilled in TypeScript, Express.js, React, Node.js, Next.js, PostgreSQL, SQL, and Python, with strong capabilities in system design, API development, and data visualization.

WORK EXPERIENCE

Data Analyst Intern | Hometop Marketing & Development Corporation (March 2025 – June 2025)

- Analyzed datasets using Excel and SQL to identify trends and improve reporting accuracy
 - Built dashboards in Grafana for better decision-making
 - Created scripts using python to automate gathering of data then push it to influxDB
-

PROJECT EXPERIENCE

Capstone Project – Full Stack Developer / QA (Aug 2024 – Oct 2025)

- Led the development and implementation of the system's core functionalities, overseeing database design, and prediction logic to ensure efficient and secure data processing and output
- Designed database and implemented prediction logic
- Performed testing and ensured ISO 25010 quality standards

Habit Streak – Auth-backed habit tracker with calendar check-ins, streaks, and a 28-day heatmap

[React, TypeScript, Tailwind, PostgreSQL, Node.js, Auth.js]

- Built a full-stack habit tracker with sign-up/sign-in, custom habits (name + accent color), and a monthly calendar to log daily completions.
- Implemented streak and usage metrics (current/longest streak, total check-ins) plus a 28-day activity heatmap for quick progress visibility.
- Added full habit lifecycle management (edit, archive, restore, delete) with a React + TypeScript UI backed by PostgreSQL and Node.js (Auth.js).

Agency Portal – Multi-tenant agency SaaS for clients, projects, tasks, and dashboards

[Next.js, React, TypeScript, Tailwind, Prisma, PostgreSQL, Clerk, Zod]

- Developed a multi-tenant SaaS-style portal for agencies to manage clients, projects, and task delivery with secure sign-in and account-scoped workspaces.
- Shipped workflow features including status, deadlines, progress tracking, rule-based project management, activity logging, and dashboard analytics.
- Delivered a responsive, mobile-friendly UI with archived records and a role-ready architecture using Next.js, Prisma, PostgreSQL, Clerk, and Zod.

Converge Payment-to-Router – Customer receipt upload + tracking; admin queue with status pipeline and router keys

[React, React Router, Vite, JavaScript, CSS]

- Built a dual-portal SPA: customers sign in, upload payment receipts, and track requests by ID; admins manage a review queue through a fixed status pipeline.
 - Implemented admin tools for notes, status updates, and issuing router keys so handoffs stay traceable from payment to fulfillment.
 - Implemented receipt preview flows using browser storage and data URLs as a client-only demo (no live payment processing).
-

EDUCATION

BS Information Technology - Polytechnic University of the Philippines (2021–2026)

SKILLS

React | Node.js | Python | SQL | MongoDB | C# | C++ | ASP.NET | Git | Grafana | TypeScript | Tailwind CSS | JavaScript | Express.js | REST APIs | PostgreSQL | Cursor | Figma | GitHub
